

COMAP

# 2016 MCM/ICM<sup>®</sup> Call for Entries

## The MCM and ICM Contests are Sponsored by:

- The Institute for Operations Research and the Management Sciences
- The Society for Industrial and Applied Mathematics
- The Mathematical Association of America
- The Department of Defense Analysis, Naval Postgraduate School
- Chinese Society for Industrial and Applied Mathematics
- Two Sigma Investments:

A group of experienced, analytical, and technical financial professionals based in SoHo, New York, building and operating sophisticated quantitative trading strategies for domestic and international markets. The firm is successfully managing several billion dollars using highly automated trading technologies. For more information about Two Sigma, please visit our Website at [www.twosigma.com](http://www.twosigma.com).

Dear Colleagues:

The Interdisciplinary Contest in Modeling (ICM), an international contest for high school students and college undergraduates, will hold its 18th annual competition in January 2016. Last year, 2137 teams from 504 institutions in seven countries participated in the contest. ICM is designed to develop and advance interdisciplinary problem-solving skills as well as competence in written communication. This year there will be three ICM problems to select from: one will focus on network science, the second on environmental science, and the third on policy. You can specifically build and prepare your team to tackle one of these topics, if you so chose.

Your institution may take part in the ICM effort by encouraging a member of your department to serve as a faculty advisor and by promoting the participation of faculty and students from associated departments. Advisors help organize the teams, distribute contest materials, and return solution papers to COMAP.

Please take a moment to read this Contest Overview, then go to [www.mcmcontest.com](http://www.mcmcontest.com) for more information about ICM history, registration, deadlines, and contest rules. All registration will take place online. If you have any questions please contact [icm@comap.com](mailto:icm@comap.com).

We hope that you and your team(s) will enjoy this modeling challenge.

Best Wishes,

Chris Arney, Contest Director

Dear Colleagues:

The Mathematical Contest in Modeling (MCM), a unique international contest for high school students and college undergraduates, will hold its 32nd annual competition in January 2016. Last year, 7636 teams from 971 institutions in seventeen countries participated in the contest. The MCM is designed to stimulate and improve problem-solving and writing skills in mathematics. Students participate as team members rather than as individuals, creating an environment for sharing knowledge and skills. Your institution may take part in the MCM effort by encouraging a member of your department to serve as a faculty advisor and by promoting the participation of faculty and students from associated departments. Advisors help organize the teams, distribute contest materials, and return solution papers to COMAP.

Please take a moment to read this Contest Overview and then go to [www.mcmcontest.com](http://www.mcmcontest.com) for more information about registration, deadlines, and contest rules. All registration will take place online. If you have any questions please contact [mcm@comap.com](mailto:mcm@comap.com).

We hope that you and your team take pleasure in this intellectual challenge and enjoy the spirit of this competition.

Best Wishes,

Patrick Driscoll, Contest Director

**Contest Director**

Chris Arney  
U. S. Military Academy, NY

**Executive Director**

Solomon A. Garfunkel  
COMAP, Inc., MA

**Associate Director**

Tina Hartley  
U. S. Military Academy, NY  
Joseph Myers  
U. S. Army Research Office, NC

**Head Judges**

Amanda Beecher  
Romapo College, NJ

Kristin Arney  
University of Washington, WA

Jessica Libertini  
Virginia Military Institute, VA

Amy Krakowka  
U.S. Military Academy, NY

Kathryn Coronges  
Northeastern University, MA

**Contest Director**

Patrick Driscoll  
U.S. Military Academy, NY

**Executive Director**

Solomon A. Garfunkel  
COMAP, Inc., MA

**Founding Director**

Ben Fusaro  
Florida State University, FL

**Advisory Board**

Ben Fusaro  
Florida State University, FL

Marvin S. Keener  
Oklahoma State University, OK

Veena Mendiratta  
Bell Labs, Lucent Technologies, NJ

Peter Anspach  
National Security Agency, MD

Maynard Thompson  
Indiana University, IN

Marie Vanisko  
California State University, CA

Karen D. Bolinger  
Clarion University of  
Pennsylvania, PA

Kathleen M. Shannon  
Salisbury University, MD

Frank R. Giordano  
Naval Postgraduate School, CA

# Contest Overview

**MCM and ICM are parallel contests and follow the same rules.**  
**All the information listed below, except where noted, pertains to both contests.**

## The Ground Rules

**Contest Date and Time:** The 2016 contests must be accomplished at a local facility starting at 8:01 PM EST on Thursday, January 28, 2016 and ending at 8:00 PM EST on Monday, February 1, 2016.

Faculty advisors must ensure that no further modifications, enhancements, additions, or improvements may be made to the team's solution paper after the contest deadline. (8:00 PM EST on Monday, February 1, 2016.)

Each team is required to submit an electronic copy of its solution paper by email to [solutions@comap.com](mailto:solutions@comap.com). The advisor or any team member may submit this email.

**Your email MUST be received at COMAP by the submission deadline of 9:00 PM EST on February 1, 2016.**

COMAP must then receive your Signed Printed Control Sheet via mail on or before **Friday, February 26, 2016.**

**The Contest Materials:** The contest Website contains all the guidelines, requirements, judging criteria, and suggested procedures for the submission of solution papers, including step-by-step instructions.

**No materials will be available in any other form.**

On Thursday, January 28, 2015 at 8:00 PM EST, the contest problems will be posted on the contest Website.

**The Advisors:** Advisors inform students about this competition and encourage the formulation of teams.

Advisors may guide and rehearse the team prior to the beginning of the competition.

During the competition, the students are expected to develop all of the substantive analysis without the help of others.

**Registration of Teams:** All teams must register online on or before January 28, 2016, at 2:00 PM EST.

**A \$100 registration fee must be paid at registration online in order to participate.**

The MCM and ICM contests allow **unlimited** teams per institution, with **unlimited** teams per department.

Each team consists of up to three high school or undergraduate students who are enrolled in school at the time of the contest.

Team members do not need to be named at the time of registration, but they must be determined before the contest problems are read.

**The Contest Problems:** Teams will choose any of six modeling problems:

- MCM Problem A (continuous)
- MCM Problem B (discrete)
- MCM Problem C (data insights)
- ICM Problem D (operations research/network science)
- ICM Problem E (environmental science)
- ICM Problem F (policy)

Data, if needed, will be attached to the problem or available on the contest Website.

Sample problems from other years are online at [www.mcmcontest.com](http://www.mcmcontest.com)

**The Report:** Participants may use all the resources available such as computers, libraries, software packages, Internet, or any other inanimate sources.

Problems are designed to be open-ended and are unlikely to have a unique solution.

Attention must be focused on clarity, analysis, and design of the solution.

The narrative section of the solution papers must be typed and in English. Partial solutions are acceptable.

**You are no longer required to mail a print copy of your Solution Paper.**

**Results:** Judging will be completed by April 2016.

Team solutions will be designated as Successful Participant, Honorable Mention, Meritorious, Finalist, or Outstanding.

The results will be posted on COMAP's Website.

Certificates and press releases will be mailed or emailed by May 2016.

Select outstanding teams will have their solution papers published in *The UMAP Journal*.

**Prizes:**  **TWO SIGMA** will sponsor a \$10,000 Scholarship Award to the two best USA teams in the competition.

The Institute for Operations Research and the Management Sciences (INFORMS) will designate an Outstanding Team from each of the problems as an INFORMS winner.

The Society for Industrial and Applied Mathematics (SIAM) will designate one Outstanding Team from each MCM problem as a SIAM winner.

The Mathematical Association of America (MAA) will designate one Outstanding Team from each problem for the MCM as a MAA winner.

For detailed information on all of the above, please go to the contest Website at: [www.mcmcontest.com](http://www.mcmcontest.com)

## Recent ICM Contest Outstanding Teams

Xidian University, China  
Shanghai Jiao Tong University, China  
Xi'an Jiaotong University, China (2)  
Tsinghua University, China  
National University of Defense Technology, China  
NC School of Science and Mathematics, NC  
Humboldt State University, CA  
Zhejiang University, China

## Recent MCM Contest Outstanding Teams

Northwestern Polytechnical University, China  
State University of New York, University at Buffalo, NY  
Chongqing University, China  
Central South University, China  
University of Adelaide, Australia  
University of Colorado Boulder, CO (2)  
Bethel University, MN  
Colorado College, CO  
Tsinghua University, China
